## EXPERIENCE

---

### Web Developer

#### DEUTSCH NY New York, NY

Jul 2018 - Present

Work with an agile team of developers, ux/ui designers, and creatives to build and deploy custom applications and websites.

*Clients worked with: Anheuser-Busch, PNC, Steelhead*

### Junior Developer

#### SECOND CHILD NYC New York, NY

Nov 2017 - Jun 2018

Work with an agile team of creative technologists, ux/ui designers, and developers to build websites, advertisements, and prototypes for clients.

*Clients worked with: Trident, Pier One, Chase, Dos Equis*

### Operations and Logistics Coordinator

#### AESTHETIC MOVEMENT

June 2011 - May 2017

Manage order tracking software (client-side administrator), provide showroom tech support, and coordinate logistics and operations for New York City trade shows. Implemented and managed commission tracking protocols using Brandwise Commission Track, man- aged and maintained 7,000 square foot showroom and office facilities.

## PROJECTS

---

### HOPPY

#### <https://gethoppy.io>

I worked with a team of four developers to create an app to cultivate internal beer culture for Anheuser-Busch. The app features a series of lessons, quizzes, and daily challenges with the reward of badges and beercoin. We built a custom CMS using React, Node.js, and SQL which handled content. The CMS included analytics (using KEEN), several CRUD functionalities for quiz and lesson data so that Anheuser-Busch can see user interaction with the app.

### GREAT MACHINE

#### <https://greatmachine.com>

I was the main developer for this site from launch to deployment. As the 'face of the company', it was important that the front end was pixel perfect. I worked with the creative director and producer very closely to make sure all of our i's were dotted and t's were crossed. The site was built using React.js and features a slick scrolling animation using Fullpage.js.

### SECOND CHILD

#### <https://secondchild.nyc>

Building <http://secondchild.nyc> was my first project at Second Child. and much like Great Machine mentioned above, I was the main developer as- signed to this project and part of the build every step of the way. The site was built using Vue.js and it features 3D animations created using WebGL as well as a dynamic UX build with the help of Green-sock. I had worked with a team of creative technologies, designers, and developers to launch to launch this site in February 2018.

### BANNERS

*Second Child banner clients: Trident, Chase, Dos Equis, Pier One  
Deutsch banner clients: PNC, Siemens*
